

Our Work

With Autism/Therapy Schools & Centers

Leveraging our non-profit expertise and familiarity with therapy specific and autism-focused facilities, Bespoke has provided strategic counsel, resourceful problem solving, and skilled negotiation to secure more than 300,000 sq. ft. of space for these organizations to grow and thrive.

CHARITIES & ORGANIZATIONS WE'VE WORKED WITH

"Working with the team at Bespoke was a perfect fit for us. From our initial conversations through closing and beyond, they have been committed to our project. The level of guidance, resources, accessibility, and engagement of Bill and the team greatly exceeded our expectations. Their understanding of the nonpublic school income structure and the needs of our special population is unlike any other firm and allowed us to target specific properties that made sense specifically for our school. The Bespoke experience was so much more than buying a property; it was a partnership in finding our forever home."

Kelly Weaver, Executive Director and Founder of Alexander Leigh Center for Autism (ALCA)
